Free Week

11 Module

Module Objective:

In the programming world, NULL is a constant that has a value of zero. Module 11 is a NULL week because it consists of no new material. The purpose of this module is to either catch up on past modules and activities as needed. This time is a good chance to make sure everything is complete before Thanksgiving break. If you have completed all the given activities, this time can be used as free time to experiment with other cyber security activities. Below are a few options of what you can do during this time.

Module Options

Component

1. Option 1	Catch up on incompeted modules and activities	
2. Option 2	Experiment with OWASP Juice Shop	Log into your previously made account

3. Option 3	Complete the Cyber Awareness Challenge	[Cyber Awareness Challenge - Settings](#)
4. Option 4	Explore Nova Labs	[Cybersecurity	NOVA Labs](#)
